INSTRUCTIONS:

STEP 1: Position 2 stakes (A & B) at least 10' apart as shown in the diagram. When positioning the stakes make sure that they are parallel to the longest length of the pool and a least 3' away from the pool.
 *Note: Do not remove until the liner has been installed.

STEP 2: Define the break-off and pad with measurements from these stakes.

STEP 3: Define the shape of the POOL by taking measurements, approximately every 2' around the perimeter of the pool.

*NOTE: Decrease the distance between the points you are using to 6' around the reverse or small radius.

STEP 4: Fill in the other measurements required as indicated by the boxes provided.

*NOTE: PERIMETER MUST BE PROVIDED SO THAT THE PLOT MEASUREMENTS CAN BE VERIFIED!!!

STEP 5: If stakes are positioned differently from the drawing indicate the position.
